
MITNIK Concrete Recycle Equipment For Sandstone Separator

MITNIK CONCRETE RECYCLE EQUIPMENT FOR SANDSTONE SEPARATOR

MITNIK Concrete recycle equipment is mainly use in washing, reclaiming and recycling the sand and stone left in sewage and residual concrete. And it is mainly consist of feeding system, stirring separator, water supplying system, screening system and recycle system. This concrete recycle equipment adopts advanced technology both home and abroad, so many features have been greatly improved. Our concrete recycle equipment is wear resistant, high efficiency and energy saving.

Model : MT10

Overall motor power : 25KW

Weight : 4500Kg

Productivity : $\geq 10\text{m}^3$

Dimension : 7000X1800X1800

The Application of Concrete Recycle Equipment:

1. Combined with the concrete batching plant
2. Combined with the concrete mixer.

-
- 3. Combined with the concrete mixer truck.
 - 4. Combined with other construction machines.

The Best Features of Concrete Recycle Equipment:

-
- 1. Stable performance and long service life.
 - 2. Easy operation and maintenance.
 - 3. High efficiency, save water and electricity.
 - 4. Full recycle and reuse of sewage and waste, realize zero emission.
