
MITNIK HZS50 Stationary Concrete Mixing Plant For Sale

THE MANUFACTURER AND SUPPLIER OF HZS50 CONCRETE MIXER BATCHING PLANT

MITNIK company production of HZS50 series of Concrete Batching Plant is composed of material weighing system, mixing system, electrical control system, powder material storage and transportation system composed of five major systems of automatic concrete mixing equipment, with high precision and high efficiency of computer control system, also equipped with a separate manual control, with the ratio of storage, automatic compensation gap, and with the printing system, can automatically production as schedule . The equipment is placed in the form of the site, the mixer and mixer can be used "- type" or "L type " arrangement. Batching machine according to user needs, can be used to store three or four kinds of aggregate.

Small Concrete Batch plant is applicable to the construction of industrial and civil construction, water and electricity, ports, docks, highways, railways, airports, bridges and other engineering construction of concrete construction and concrete pre products factory and commodity concrete production plant.

HZS50 Concrete Plant series of small and medium-sized mixing station equipment, HZS50 stirring station of the productivity theory per hour 50 cubic meters, 2xHZS50 concrete mixing station productivity theory about 100 cubic meters per hour, HZS50 station host for JS1000 type forced mixer, batching machine types for PLD1600, spiral conveyor for LSY273.
