## MITNIK YHZS75 Mobile Concrete Mixing Plant For Sale

### THE INTRODUCTION OF PORTABLE CONCRETE BATCHING PLANT AND MIXING PLANT

---

YHZS75 portable concrete batching plant it is for short construction period, construction line length, frequent transitions of users design and development of movable concrete mixing equipment. The concrete machine structure is compact, cover an area of an area small, easy installation, high degree of automation, widely used in bridge, construction, water conservancy, electricity and other infrastructure construction.

PORTABLE CEMENT BATCH PLANT WITH GOOD PERFORMANCE:

---

#### 1. Quick disassembling, mobile convenience:

Portable batch plant quick disassembling and mobile convenience: Except external equipment of concrete batch mixer such as screw conveyor, cement silo, mixing station all connection does not need to be removed, only 30 tons crane to cooperate, can finish moving in a day shift. When

---

installation, such as ground smooth solid, don't need to base, can be put in place the production in the day, the construction unit is very suitable for tighten project.

2. With good mixing performance: With force and double shaft mixer, can achieve even mixing stir with the shortest time. For harsh, half dry rigid, plastic and all kinds of proportioning of concrete can achieve good agitation.

3. configuration, high-grade, high reliability and measuring precision, easy to operate

4. Mixing console reducer, measuring sensor, and the control system of main electrical components are imported components, not only greatly reduces the failure rate of equipment, and improve the measuring precision of the equipment.

5. The machine adopts computer control, can also can manual operation, automatic operation is simple, easy to master. Dynamic panel displays, can clearly understand the operating condition of the parts, can be stored, printed reports data at the same time, provides great convenience for production scheduling management.

PORTABLE CONCRETE BATCH PLANT STRUCTURES:

YHZS MOBILE TYPE CONCRETE BATCHING PLANT STRUCTURE

- |                              |                          |                     |
|------------------------------|--------------------------|---------------------|
| 1. Air Compressor            | 6. Hanging Seat          | 11. Reducer         |
| 2. Bean                      | 7. Weighing Sensor       | 12. Mixing Bracket  |
| 3. Aggregate Bin             | 8. Trough Conveying Belt | 13. Main Mixer      |
| 4. Aggregate Hopper          | 9. Supporting Legs       | 14. Weighing System |
| 5. Aggregate Weighing System | 10. Supporting Bar       | 15. Walkway Path    |
