
High Capacity Wheel Mobile Crusher Plant For Sale

MITNIK WHEEL MOBILE STONE CRUSHER BY CHINA MANUFACTURER

MITNIK Mobile crushing plant is high-efficiency and modular equipment. Mobile crusher machine, also called mobile crusher plant, mobile stone crusher, mobile crushing plant or mobile stone crusher. This mobile crusher is an integrated machine of vibrating feeder, stone crusher, vibrating screen and other auxiliary equipments. So mobile crusher is a mobile stone crushing plant in fact. The mobility of mobile crusher can overcome the limited by the crushing place, and reduces high material transportation cost meanwhile.

It can work by single machine, as well as combination of several machines to be a plant. It is widely used in road and bridge construction, urban construction, building garbage disposal, mining, metallurgical, energy and other departments for crushing plant operations.

Mobile Crushing Plant

【Type】:Wheel Mobile Crusher

【Capacity】:30-250 T/h

【Processible Materials】:Concrete waste, iron ore, copper ore, gold ore, manganese ore, gravel, granite, river stone, basalt, limestone, dolomite, quartz, coal, etc.

【Application】:Iron ore, copper ore, gold ore, manganese ore, limestone, granite, basalt, andesite, quartz, silica, gypsum, volcanic rock, marble, river stone, gravel, coal etc

Mobile Crusher Machine Features:

1. Flexible convenient and versatile; It can save a lot of infrastructure and removal cost;
2. Reasonable compact space layout greatly reduces the the occupied space of the equipment in the field;
3. Crushing materials in working site immediately and moving with the mining surface of raw materials greatly reduce the material transportation cost;
4. The equipment chassis is high and the turning radius is small make it easy to travel on ordinary road and the rugged road;
5. It can use external power supply as well as high reliability diesel generator;
6. The technology for crushing and screening equipment is mature structure is compact and performance is stable.
