
30T/50T DZJL Electric Heating Bitumen Tank Asphalt Storage Tank For Sale

MITNIK DZJL SERIES ELECTRICAL HEATING BITUMEN STORAGE TANK

FOR ASPHALT MIXING PLANT

MITNIK DZJL Electric heating asphalt storage tank/bitumen tank is heated by the electrical heated tube. The structure is compact, easy installation and transportation, easy operation, high level of automation and no pollution during the construction. The bitumen tank is widely used currently.

MITNIK DZJL Series Electric Heating Asphalt Tank Features:

-
- ★Taken the new type electric heating more energy saving and environmental protection
 - ★Taken the electric control automation, automatic stop
 - ★Taken the indirect heat conduction oil heating, no damage to asphalt
 - ★Taken the built-in high area "tank inside tank design" layout, small tank heating up fast
 - ★Fully insulation, thermal insulation cover "blind Angle", to reduce heat loss
 - ★Tank with large volume , low center of gravity and compact structure.
 - ★The bitumen tank is equipped with electric heating system, heating effect is good, no pollution.
 - ★With liquid level display and alarm system, easy to control bitumen liquid level height in the tank.
 - ★ Electric heating bitumen tank can not only heat bitumen , also can heated oil products, chemical products, volume of tank can be customerized , customer can choose anti-corrosion materials, etc.
