
YK Series Fast thermal Energy Saving Asphalt Heating Storage Tank By Coal Heating

MITNIK YK SERIES FAST THERMAL ENERGY SAVING ASPHALT HEATING STORAGE TANK

MITNIK YK series fast energy-saving straight coal-fired hot asphalt heating storage tanks is MITNIK company to create early flagship product, it was more than ten years to the advantages of fast heat, energy saving, efficient sell well in more than a dozen provinces and municipalities of the country's highway construction and maintenance unit, won the user's consistent high praise and praise.

Bitumen Tank Equipment: mainly include tanks, built-in coal-fired furnace, asphalt heater, high temperature small tanks, flue, dust catcher, induced draft fan, asphalt, asphalt temperature display, steam generator, pump pipeline and preheating system, asphalt pump pressure drain system, gym, power distribution control box and unloading oil into the pot device (optional), etc. All components are installed on the tank (within) form a compact body structure.

MITNIK YK Series Coal Heating Bitumen Tank Container Features:

- 1.It is suitable for the matrix asphalt rapid warming.
- 2.Tank and tank layout, how much we use heating, asphalt heating quickly, save fuel, asphalt is not repeated heating.
- 3.Taken the built-in heating furnace heat transfer directly, fast heating, high thermal efficiency.
4. Pluripotent, painted a pump unloading into the tank and pump for outside, still can circulate in auxiliary uniform heating up, high, low oil, high temperature uniformity in asphalt, low mouth empty cans.
- 5.At a relatively economic coal as fuel, heating costs.
