## FMZSL Square Oil Fuel And Conduction Oil Heating Asphalt Tank Bitumen Storage Tank For Sale

### MITNIK SQUARE TYPE DOUBLE HEATING BITUMENT STORAGE TANK

#### WITH OIL FUEL AND CONDUCTION OIL HEATING TYPE

---

FMZSL Square Type Oil Fuel And Conduction Oil Heating Asphalt Tank Bitumen Storage Tank applies to matrix asphalt rapid heating up, and emulsifying equipment and modified asphalt equipment supporting the use.

FMZSL Square Oil Fuel And Conduction Oil Heating Asphalt Tank Bitumen Storage Tank Features:

1. This product will be made heat conduction oil furnace and asphalt tank in one combined, realize "a tin of dual-use" can heat up asphalt and is available for high temperature heat conduction oil, water temperature in a perfectly solve the emulsified asphalt equipment and pipeline preheat temperature of asphalt pump group.
2. Tank and tank design layout, how much we use heating, asphalt heating quickly, save fuel, asphalt is not repeated heating.

- 
2. Taken the built-in thermal oil heating layer and heat conduction oil cooling coil, prevent coking furnace caused by direct heating asphalt aging.
  2. More exhaust pipe and oil heat coil two sets of heater, super cooling area, fast heating, high thermal efficiency.
  - 3.Pluripotent, painted a pump unloading into the tank and pump for outside, still can circulate in auxiliary uniform heating.
  - 4.Taken the high and low oil design, high temperature uniformity in asphalt, low mouth empty tanks.
  - 5.To end with a clean diesel oil as fuel, emissions targets is superior to the requirements of environmental protection.
  - 6.Taken the equipment imported burner, more stable performance, low failure rate, saving energy and reducing consumption.
  7. Cooperated burner temperature automatic control, automatic start and stop after the set temperature.
  8. Save labor intensity, simple operation, high degree of civilization production.
  - 9.Taken the square design in the limited space for maximum effective volume, saving transportation costs and site occupied area
  - 10.Taken the control room and "seamless" of tank, neat appearance, beautiful, rain guard against theft.
  - 11.Taken the container size integration design, convenient export packing.
